Milgard launches AX550 Moving Glass Walls for indoor-outdoor living

TACOMA, Wash. – Milgard Windows & Doors launches new AX550 Moving Glass Walls in standard and custom sizes for both new home construction and replacement or remodeling projects.

The AX550 features a modern, aluminum frame with narrow sightlines available in four colors: white, tan, dark bronze anodized, and clear anodized. With panels as high as ten feet and as wide as 5 feet, this moving glass wall offers a variety of configuration options to create wide wall-to-wall entrances.

“Large, expansive patio doors are in high demand for homeowners who enjoy indoor-outdoor living,” said Brent Wright, Milgard Product Manager for Doors. “We developed our AX550 Moving Glass Walls with that need in mind, featuring a narrow frame profile for a modern look that creates a beautiful statement piece in the home while effortlessly blending indoor and outdoor spaces.”

Available in pocket, stacking or bi-fold operating styles, AX550 features a Thermally Broken Aluminum design for year-round comfort and energy efficiency in the home.
